TECHNICAL SKILLS

Programming: Python, C, SQL, JavaScript

Web Development: HTML, React, .NET

Database: PostgreSQL, Supabase

Tools & Technologies: Git, Docker, VS Code

EDUCATION

Trent University

Master of Science in Applied Modelling and Quantitative Methods

Peterborough, ON

Expected Graduation: August 2026

University of Toronto

Honours Bachelor of Science (Co-op)

- Computer Science Specialist

Toronto, ON

September 2020 – August 2025

EXPERIENCE

Ontario Ministry of Education

.NET Developer (Co-op)

Toronto, ON

September 2024 – December 2024

- Contributed to the development and maintenance of web-based data systems supporting Ministry initiatives including **Identity and Access Management (IAM), Ontario School Year Calendar (OSYC), and the Math Achievement Action Plan (MAAP)**.
- Updated annual data collection forms and dashboards to align with **2025 reporting requirements**, modifying form fields, labels, and validation rules based on evolving business requirements.
- Developed a **comprehensive testing dashboard** containing key system features to support regression testing and ensure system functionality before **deployment**.
- Collaborated with developers and QA teams to **identify, diagnose, and resolve software defects**, improving system stability and reliability.

Ontario Ministry of Education

IT QA Assistant (Co-op)

Toronto, ON

January 2024 – August 2024

- Performed manual testing for web-based data collection systems used by Ontario schools to submit student enrollment, course participation, and funding request data.
- Executed test cases using HP ALM to validate application functionality, user workflows, and data submission processes.
- Tested role-based access controls by validating login permissions for different user types.
- Documented and tracked software defects in HP ALM, providing clear reproduction steps and expected outcomes to support efficient debugging by developers.

PERSONAL PROJECTS

Job Application Tracker | React, Vite, Supabase, PostgreSQL

Live Demo: <https://apply-track-six.vercel.app/>

- Built a full-stack job application tracking platform using React, Vite, Supabase Auth, and PostgreSQL with Row Level Security to provide secure user-scoped data access.
- Implemented authenticated CRUD functionality, including search, filtering, sorting, pagination, bulk selection, and bulk deletion for efficient application management.
- Designed an Excel import workflow using SheetJS to parse, normalize, preview, and bulk insert application records into the database.
- Developed analytics dashboards with Recharts and implemented a secure password recovery system using Supabase Edge Functions, Deno, Supabase Admin APIs, and Resend email delivery.
